OFFERINGS OF CATTLE VERY MEAN

And Markets Dragged at a Sharp Decline From Last Week.

SHEEP VERY DULL, AND HOGS STEADY

OFFICE OF PITTSBURG DISPATCH, ?

WEDNESDAY, November 6, 1889. Markets were very far from antisfactory. either to buyer or seller. Quality of offerings was below average and markets dragged for everything offered with the exception of hogs, which had their tumble last week, and are now fairly steady at the decline.

The run of cattle was about 130 loads, against an equal number last week. Of these received there were less than a dozen loads of good cattle, and none that were strictly prime. There were eight to ten loads weighing 1,400 to 1,500 pounds of fair butchering stock, which ranged in price from \$4 10 @\$4 30, the latter figure being the highest price paid by the ear load.

Good Cerrie Go Enst.

There was not sufficient demand to absorb this small lot of good cattle at these figures, and a number were sent on to New York. Said a leading stockman: "The cattle offered at the vards this week were the meanest for the number I have seen here any time this season. Shippers will not learn that this is a very poor market for the coarse, rough, bony ock that has been unloaded here this week." Prices were off on these low grades from 15@ 20c on Monday and the dregs were closed out to-day at 10@15 below Monday's prices. Better grades were 10@15c lower than a week ago. There were no export buyers on hand. In the offerings were some 15 to 29 loads of common stockers and feeders. The range for stockers was 15 c. to 25 c., one load having been sold at the first figure, which was the lowest this season. The range for feeders was \$3.00 to Sheep and Lambs.

Supply was much larger than last week, and markets were very slow at lower prices. At noon to-day there were a number of loads unsold. Shippers who came out even on this week's consignments to East Liberty yards were very locky. It is the general view that some have met with heavy losses. There was no opening in Eastern markets, as advices from there were unfavorable, and those left , it is thought, can only be disposed of at ever, it is thought, can only be disposed of acheavy lose.

A few loads from Chicago must have entailed on the shipper a loss of nearly \$60 to the

A Large Run of Hogs.

The run was larger than last week but markets have ruled steady, and are stronger to-day than at the beginning of the week. The range for the best Yorkers and Philadelphias is \$4.00 @4 25. Cooler weather has been favorable to markets, giving a better tone to trade, and a goodly number of country buyers were on hand at the beginning of the week which had a strengthening influence. Advices from Chi-cago one of our leading packers this morn-ing, are that with receipts there of 22,000 hogs, arkets are 5c off, making the outside price

The Man With a Shargun Kills His Opponent, Who Had a Revolver.

FREDERICKTOWN, Mo., November 6 .-Carroll Hicks and James Jordan, young this month. farmers living 20 miles south of here, had a quarrel last week over the disappearance of some timber. Hicks accused Jordan of stealing, and Jordan called Hicks a liar. They made arrangements to meet in a field near the Hicks place and settle it yesterday. Hicks appeared with a double barreled shotgun and Jordan with a revolver. They began shooting at each other when within 50 vards, and the shot did the most execution. Jordan was killed at the second fire. Hicks walked off unconcernedly to his home.

Three men witnessed the murder.

A Moderate Movement in Wheat, With Prices Higher Than on Monday-Pork Weak and Early Improvement Lost.

CHICAGO-There was a fair speculative trade

in wheat, but credited principally to local oper-ators. There was no special news to affect the course of the market, and local influences were the controlling power. There was fair buying early, a prominent local operator being represented as having bought freely around 80% for December. The offerings were rather light and a strong feeling was developed in consequence. Shorts were induced to cover, and possibly apprehended manipulation. There were weak spots which it was claimed was due to some realizing at the advance, but most of the session

the feeling was firm again and prices over clos-ing quotations of last Monday were recorded. The opening was 16016c higher, advanced le more, then declined 368%c advanced 36%c and closed %c higher for December and 1/40 higher for May than last Monday. Cable advices quoted wheat quiet and steady. A cable-gram was received placing the entire crop of Southern Rossia at 70 per cent less than last year. The receipts in the Northwest continue very heavy, and this was one of the weak features of the market. Corn ruled quiet the greater part of the ses-sion, trading being mainly local and fluctua-tions narrow. The feeling early was rather easier due to fine weather, was firmer later, when the cash market opened, there being a

NEW YORK, November 6.-The correspondent of the Catholic Review at Rome | manufacturing industries is erroneous. The writes that the Pope has completed, after two years' labor, an encyclical on the social question. It is divided into two parts, one philosophical and doctrinal, the other of practical application. The first part will be wholly original and the second part will recapitulate teaching already given. The Pope has consulted the most notable authorities on the social question, especially Cardinal Manning, about pacific arbitration to settle differences between employers and settle differences between employers and

A BOOM FOR CALIFORNIA AVENUE.

Twenty-Third Ward and Its Relation to the Proposed Schenley Park.

BUSINESS DRAWING MEN OF ABILITY

Among several rumors, all of them emanating from good sources, which were circulated on Fourth avenue, yesterday, was one to the effect that a syndicate, of whom Mr. F. Gwinner is one, had bought vices quoted wheat quiet and steady. A cable- 11 or 12 acres of land in the Eleventh ward, Allegheny, for which they paid \$50,000. The purchase was made as a speculation. W. A. Herron & Sons, who have charge of the property, refused to furnish particulars at present. It is supposed that this deal has an important bearing on the completion of California avenue and the electric road by which it will be traversed.

Another rumor had reference to a transa action in the upper part of the city, involving \$100,000, but the agent of the property said he was not in a position to make a statement. There is little doubt, however, that the sale

The Twenty-third ward will, no doubt, be greatly benefited by the Schenley Park, which may be put down as a certainty, since, so far as known, there is no longer a serious obstacle to its establishment. The park bounds the ward on the north side. The streets and avenues are so laid out as to converge on the park, giving easy access to it from all parts of the ward. The great advantages, from a domestic point of view, to be derived from the park, has stimu-lated the demand for building sites to something akin to a rush, and is bringing the ward into such prominence as will result in its rapid settlement by a class of people able, for the

most part, to build good houses and make improvements to correspond.

The electric road on Second avenue, which will connect with several other roads for which charters have been granted, will give the Twenty-third ward a system of rapid transit unsurpassed in any other portion of the city. This will materially enhance its value as a residence district.

The physical features of the ward are of great natural beauty such as many, even of the oldest residents, have but little conception of, On the south and west there are magnificent river and landscape views, the latter embracing the whole of the Southside. On the north is the Schenley Park, which it is proposed to make one of the finest for its size in the United States. The surface is agreeably diversified by hill and dale, giving a charming variety to its topography.

The ward contains a considerable amount of vacant land, but, owing to the active demand for it which has lately sprung up, it will no doubt be bought up and built on in a short time. Building sites are selling at from \$1,000 to \$2,500 an acre, according to location and con tiguity to the park-those adjoining the park being rated highest.

This is an advance of from 15 to 20 per cent over last spring's prices, and probability favors another rise of at least 25 per cent within the next 12 months. But this is not regarded as excessive, in view of the costly improvements in contemplation, which will naturally add to the value of the land.

selves. There are too many mere talkers in the National and State Legislatures. More men of practical business experience are needed here. He believes that if the business interests of the country were properly represented in Congress a remedy would be speedily found for the existing inequalities of trade with the countries of Central and South America. The conditions should favor us, and we should not be controlled or governed by mere sentiments or prejudice. If we need legislation which will open the doors of those constries to us we should modify our laws. The suggestions of the distinguished jurist are timely. There is no doubt that too many

in 1888, but the gain in 11 months was greater than it would have been in most parts of the country in as many years. The following figures tell the story. Tacoma, which in 1888 had 2,435 votes, in 1889 had 5,324; Seattle in 1888 had 3,571 against 4,560 in 1889; Spokane Falls had 2,435 against 3,148 in 1889. According to these figures Tacoma must have a population now of at least 30,000. At the time of the last census, nine years ago, it had 1,008, or rather the old town that bore its name had that many, the present city not being in existence. Seattle had 8,533, or 1,000 less men, women and children than it now casts votes. The present popula-tion of Seattle is not less than 25,000. Spokane Falls was credited by the census with 350 inhabitants. It now casts nine times as many

MOVING UP

Railroad Shares More Active and Higher-Money Easier-Cotton Oil Declines Under Unfavorable Rumors, but Railies-Bonds Surprisingly Numble.

NEW YORK, November 6.-The stock market was more active to-day for the regular list, and the tone of the dealings, while feverish and irthe tone of the dealings, while leverish and if-regular, was generally firm, and toward the closs positive strength was developed, which resulted in the establishment of material advances all over the list. The feature of the day was the heavy selling of Reading, though the stock re-ceived good support, and the final decline is

time since the reorganization. The bears sold the stock liberally, and liquidation of long ac-counts assumed large proportions, while some stop orders were unnerved. The decline in Reading, with the heaviness in the other Coal-ers, retarded the rest of the list, which displayed an advancing tendency throughout the day.

day.

Cotton Oil was a disturbing factor in the early portion of the day, weakening under the rumors of a shortage in the accounts of the company to be disclosed at the meeting of the trustees, but the matter was set at rest by a trustees, but the matter was set at rest by a card from the chairman saying that the shortage would amount to \$277,000, which quieted apprehension, and as the feeling became more setiled, the worst being known, there was a marked improvement in the certificates after that time. Money eased off as the day wore on, and loans were made at 4 per ceut, which helped along the bullish feeling, and in the last hour the upward movement became most pronounced, Louisville and Nashville being particularly conspicuous on indications of inside buying. Missouri Pacific also responded with a material improvement, and it was known that inside support was given the stock. A number of the specialties made marked advances, and the Grangers were also prominent late in the day for the strength displayed. The vances, and the Grangers were also prominent late in the day for the strength displayed. The close was strong. The only decline of note was 1½ in Reading, while Chicago Gas rose 2½, Louisville and Nashville 1¾, Denver, Texas and Ft. Worth 1¾, Atchison 1¼, and Rock Island 1¾, Railroad bonds were active for the first time in months to day the sales of all issues reach-Railroad bonds were active for the first time in months to-day, the sales of all issues reaching \$2,173,090, and the tone of the dealings was strong all the way out, though there were few marked advances made outside of the specially strong issues, the Kansas and Texas and the Gulf, Colorado and Santa Fee. These were not only foremost in point of strength but also in activity, and the Kansas and Texas 5s furnished \$167,000, the 6s \$323,000 and the 7s \$164,000 to the total, while Gulf, Colorado and Santa Fe 1sts contributed \$222,000. There were no declines of any importonce. clines of any importonce.

The Pow's tinancial article says: Notwithstanding the continued weakness and further decline of Reading, and in spite of some trans-

decline of Reading, and in spite of some transparent attempt to get up sensations about Missouri and Cotton Trust, the general stock market was strong, and with the exception of Reading and Cotton Trust all stocks were ½ to 1 per cent. nigher at 12 o'clock than they closed on Monday. The belief that the stringency in the money market is over and that, though rates for call loans may not be reduced much at once, there will be expected. there will be a gradual easing of the market during this month, had a good deal to do with the improvement in the stock market, though as far as the Western stocks are concerned, the news that the Chicago roads have agreed to ad-vance rates to the Northwest about 30 per cent. was a special factor in advancing the prices of
